- *TOP 5 contacts now showing*
- *Improved search and filters*
- *US state search*

What is the impact of the current economic climate on the labour and employment market?

Europe faces significant challenges, including deindustrialisation, digitisation, a shift in European defence and military spending, climate changes, and international restrictions on trade.

How do MSI colleagues navigate through the employment and cross-border complexities and to define quality in terms of 'speed vs. effectiveness'?

Bullying at work.

How to spot it and steps to stop it in today's global workplaces?

In today's increasingly global workplaces, bullying has evolved. While many employers recognise the importance of addressing such allegations, from a cost, PR and culture perspective, cultural and intergenerational diversity gives rise to new challenges.

How do MSI colleagues handle "upward bullying" where managers are targeted? Or address biases which may misinterpret behaviour by women or people of colour as bullying?
